

## **BAHAY KUBO RESEARCH SURVEY FORM**

### **TO OUR FILIPINO COLLEAGUES:**

Greetings!

Bahay Kubo Research is an ongoing project with the primary goal of establishing an online database of Filipino researchers all over the world. The project aims to consolidate the work of Filipino researchers in various fields of expertise and to promote research cooperation among Filipino researchers. As an initial task, a compilation of short biographies of Filipino researchers, their current research interests, and list of their publications has been undertaken. The information gathered so far is now posted in the project's official website located at <http://www.bahaykuboresearch.net/>.

To expand the coverage of the compiled information, we are now in the process of setting up an online database where researchers can directly post their profiles and search the profiles of other Filipino researchers. To facilitate this process, we are conducting this survey in cooperation with academic societies inside and outside the Philippines. We hope that you will lend us a little of your precious time in filling up this form and sending it back to us.

We appreciate your active participation in this endeavor. Thank you very much.

Yours truly,

Bahay Kubo Research Team
